Creating a user journey is a quick way to help you and your team gain a deeper understanding of who you're designing for, aka the stakeholder in your project. The information you add here should be representative of the observations and research you've done about your users. \triangleright

1 Phases High-level steps your user needs to accomplish from start to finish	Framework	Data analysis and processing	Planning of interventions	complete the work
2 Steps Detailed actions your user has to perform	Designing an efficient plan for monitoring	Designing effective report mangement mechanism	Recommendation for project improvement	ensuring guideliness
S Feelings What your user might be thinking and feeling at the moment	Doing project happily	prevent the people	give more intelligence	full satisfaction
	uneasy	worry	scary	full attention
